## ABSTRACT

A motorized bicycle, using a standard bicyle frame, having a front wheel and rear wheel attached thereto. Pedals are provided are are linked to the rear wheel with a drive train to allow the bicyle to operated with pedal power. An internal combustion engine is linked to the drive train with a clutch, for selectively allowing the engine to be engaged to drive the bicycle. A throttle is provided for controlling the engine, and brakes are provided for slowing the wheels of the bicycle.
